QUALITY POLICY STATEMENT

PPSL District Energy are Building Services Contractors with a speciality in the design, supply and installation of energy systems and contained, jacketed or conventional piping, we also supply and install fluid monitoring/detection systems.

The Quality Manual describes the procedures applicable within the Company which when followed will ensure that the design, specifications and installations supplied, assure fitness for purpose through the systematic application of procedures designed to achieve a result which satisfies the requirements of the client.

It is the responsibility of the Directors and senior members of staff to ensure that all briefing, planning, design, specifications, purchasing, manufacture, installation and commissioning is carried out in accordance with the procedures detailed in this manual and supporting documentation, by every member of the Company.

The Quality Assurance Manager has the authority and responsibility for ensuring that the policies defined in this Manual are implemented and will report to me annually on the status and adequacy of the system making recommendations for any changes he considers necessary.

To ensure the success of the Quality Assurance System every member of the Company must be fully conversant with all the procedures which affect his/her particular area of movement. To achieve this objective each individual must be fully aware of all aspects of this system and have access to all necessary documentation.

This Quality Assurance System is based on the recommendations described in BS EN ISO 9001:1994 Quality Systems and takes account of BS EN ISO 9000-2:1997 Quality Management Guidelines and complies with the HVCA Inspection and Assessment Scheme administered by BM TRADA.

Signed: G J Wells

Managing Director

To be reviewed annually.
